

SONAKSHI ARORA

New Delhi, India | 9821709360 | sonakshiarora1709@gmail.com | linkedin.com/in/arora-sonakshi | github.com/sonakshi-17

PROFILE

Computer Science student with solid backend expertise and practical development experience, passionate about building scalable, high-performance systems that solve real-world problems.

EDUCATION

Bachelor of Technology in Computer Science and Engineering | August 2023 – Present | Amity University, Noida
Higher Secondary (12th) | April 2022 – 2023 | Presentation Convent Sr. Sec. School, Delhi

PROJECTS

- Smart Nearby Places Recommender (Python, API Integration, Tkinter)
Built a Python-based location recommendation system using Google Maps Places API to address inefficient nearby place discovery through mood-based filtering and distance-prioritized suggestions via a Tkinter interface.
- Medical Symptom Extraction System (Python, NLP, NLTK)
Faced challenges in early risk detection from unstructured medical inputs; designed an NLP model to extract symptoms and assign risk categories. Enabled faster preliminary assessment and structured healthcare insights.
- Study Assistant — Context-Aware Doubt Solver (Python, LangChain, FAISS, Gemini API, RAG)
Addressed the challenge of students struggling to find relevant answers from lengthy study materials; developed a RAG-based Q&A system where users upload PDFs and receive context-grounded answers, reducing manual search effort and improving study efficiency.
- AWS Static Website Hosting (Amazon S3, CloudFront CDN, IAM)
Hosted a scalable website using Amazon S3 with CloudFront CDN for efficient global delivery. Achieved low-cost, high-performance deployment while gaining hands-on experience in cloud hosting and access management.

EXPERIENCE AND TRAINING

Summer Intern – Chat-Bot Song Recommendation System

Amity University, Uttar Pradesh | Apr 2024 – Jun 2024

Designed and implemented a scalable song recommendation system that gives personalised song recommendations by understanding user mood in real time, leveraging AI sentiment analysis techniques. The solution also included an NLP-based chat interface for user interaction, feeding into user profiling.

Summer Intern – Fitness Tracker System

Amity University, Uttar Pradesh | May 2025 – Jun 2025

Solved the problem of scattered fitness data by developing a database-driven Python application with secure login, BMI computation, and workout logging, ensuring organized tracking and reliable health progress analysis.

CERTIFICATIONS AND PROFESSIONAL DEVELOPMENT

- Python for Data Science | January 2024 – February 2024 | NPTEL
- Data Structures & Algorithms | December 2024 – January 2025 | Internshala
- Introduction to Generative AI | January 2025 | Google Cloud
- Introduction to Networks | July 2025 – December 2025 | CISCO
- Cloud Computing Practitioner | December 2025 – March 2026 | AWS

SKILLS & ABILITIES

- Programming & Databases: Python, Tkinter-GUI, C, C++, Java, MySQL, MongoDB
- Core Concepts: Data Structures & Algorithms, OOP, DBMS, SQL, Operating Systems, AI, NLP, RAG (Retrieval-Augmented Generation), LLM Integration, Vector Search
- Cloud & Tools: AWS (Fundamentals), S3, EC2 (Basics), GitHub, Gemini API, LangChain, FAISS
- Other Skills: Problem Solving, Analytical Thinking, Communication, Adaptability
